## **HAVE YOU TESTED YOUR SYSTEM LATELY?**

It is recommended you regularly test your security system. This is a very simple procedure that only takes a few moments. Simply call the central station at (888) 762-7857 place your system on test with your "password." Set Alarm and open a window, etc. to send signals to central station and call them back to verify receiving them. It's that easy!!

More detailed information available in your owners manual or by calling us at (530)273-5166 for assistance.

## **ANY CHANGES IN YOUR PHONE SERVICE?**

In today's changing world of technology many people are switching from traditional phone service to Voice over IP technology, Vonage, Comcast, etc. in an attempt to bundle costs. Still others are eliminating traditional phone service to have Cell only service.

These changes will affect your alarm system if you do not call and advise us of any changes so we can update and test your alarm with your new service.

Many of these services will also result in periodic lapses in service when either power or internet service is down.

Beam Security will advise you of any needed adjustments, potential problems or options such as GSM (Global System for Mobile) which uses the cellular phone network for monitoring.

So please make sure you call if you are considering discontinuing your traditional phone service to avoid any lapses in service.

## **EVEN MORE OFFERINGS FROM BEAM**
